## Fibragent

Complex vascular-protective formula with enzymes, phytonutrients and mild anti-inflammatory support.

### Ingredients:

- **Gynura** - phytohemostatic, regulates vascular tone;
- **Astaxanthin** - powerful antioxidant, endothelial protection;
- **Taxifolin** (dihydroquercetin) - improves microcirculation and capillary condition;
- **Fulvic acid** - increases bioavailability and drainage function;
- **Lumbrokinase** - natural enzyme that breaks down fibrous deposits, improves blood flow;
- **Nattokinase** - destruction of fibrin clots and cleansing vessels from spike protein;
- **Serrapeptase** - proteolytic detoxification: removal of protein debris and inflammatory proteins;
- **Danshen** - vascular phytosupport from Chinese medicine, antiplatelet agent;
- **Silymarin** - hepatoprotector, antioxidant, liver cell stabilization;
- Salicin (from willow bark, 20 mg) - mild anti-inflammatory and analgesic, without aggression to the gastrointestinal tract;
- **Glutathione** - restores the antioxidant status of cells.

HARMONY AND HEALTH

- **Glutathione** - restores the antioxidant status of cells.

### **Key mechanisms of ingredient's action:**

#### **Vascular cleansing and normalization of blood fluidity:**

- Triple enzyme system: lumbrokinase + nattokinase + serrapeptase;
- Reducing blood viscosity, dissolving fibrin, preventing microthrombosis. Anti-inflammatory and antioxidant action:
- Salicin + taxifolin + astaxanthin + danshen;
- Reducing oxidative stress.

#### **Post-COVID and systemic rehabilitation:**

- Cleansing from the spike protein (nattokinase);
- Reduction of residual inflammation;
- Improvement of microcirculation in tissues.

#### **Liver support and drainage:**

- Silymarin + fulvic acid - protection of hepatocytes and removal of decay products;
- Acceleration of metabolism of active substances and reduction of the load on the liver.

**HARMONY AND HEALTH**

### **Indications for use:**

- Post-covid syndrome, vasculitis, inflammation of the vascular wall;
- Microcirculation disorders;
- Vascular complications of hypertension;
- Increased blood viscosity, hypercoagulability syndrome;
- Decreased liver function due to intoxication, course medication;
- Detoxification programs, anti-aging approach.

### **Advantages of Fibragent:**

- Natural composition without synthetic fillers;
- Enzyme system with three-level vascular cleaning;
- Microdosed salicin - safe for the stomach, effective for controlling inflammation;
- Liver protection and improved drainage;
- Suitable for long-term use and cyclic use;
- Ideally combined with cognitive and cardioprotective programs;

### **Contraindications:**

- Individual intolerance to the ingredients;
- Pregnancy, lactation;
- Caution when taking anticoagulants and non-steroidal anti-inflammatory drugs (under the supervision of a doctor).

**HARMONY AND HEALTH**

**Dosage form:** enterocapsules, rectal suppositories;

**Packaging:** 40 capsules

**Regimen:** 1 capsule 1 time per day, 40 minutes before meals, or at night, suppository 1 time every two days at night.

**Disclaimer.** Fibragent is not a medicine; consultation with a doctor is required before use.
