

HEPTARYL

The ingredients of the complex are used for deep detoxification, liver restoration, and prevention of fibrosis. The formula is enhanced with **Red Sage Extract** (Danshen) – one of the key components of traditional Chinese medicine, proven effective in hepatology and angioprotection.

Mechanisms of action:

- **Silymarin** – protects hepatocytes, stabilizes cell membranes, and accelerates liver regeneration.
- **Danshen extract (*Salvia miltiorrhiza*)** – improves microcirculation, reduces inflammation, prevents the development of fibrosis and steatosis, and enhances the antioxidant and vascular effects of the complex.
- **Gynura procumbens** – regulates vascular permeability, carbohydrate metabolism, and immune response.
- **Taxifolin** – reduces oxidative stress and strengthens liver capillaries.
- **Astaxanthin** – a powerful mitochondrial antioxidant that normalizes energy metabolism in liver cells.
- **Glutathione** – a key component of phase II detoxification, protects the liver from overload.
- **Fulvic acid** – improves absorption of components, binds toxins, and helps remove them from the body.

HARMONY AND HEALTH

Form of release:

- Enteric capsules — gradual release in the intestine.
- Rectal suppositories — rapid systemic absorption and high bio-availability.

Directions for use:

- Weeks 1-2 — 1 suppository at night
- Afterwards — 1 capsule in the morning on an empty stomach

Course: 3-4 weeks, then a 2-week break.

The ingredients of the complex are used in clinical practice for:

- Chronic liver stress (drug-induced, dietary, or alcohol-related);
- Metabolic syndrome, fatty liver (steatosis);
- Prevention of fibrosis and inflammation;
- Elevated liver enzymes;
- Post-infectious or toxic liver damage.

This product is not a medical drug. Consult your physician before use.
