

NEFRONIT

NEFRONIT — Natural Kidney Protection.

Nefronit is a complex designed to support kidney health, restore filtration function, reduce inflammation, and provide gentle detoxification.

It contains natural substances with well-studied properties confirmed by many years of research:

Gynura (Gynura Procumbens) — a plant with pronounced nephro-protective activity. Research and clinical practice show that Gynura extracts protect the kidneys under toxic load, reduce cell damage during drug intake, and enhance recovery after acute injury.

Astaxanthin — one of the most powerful natural antioxidants, slows down inflammatory processes and protects nephrons from damage.

Luteolin and Rutin — strengthen blood vessels, improve microcirculation, and support kidney filtration capacity.

Glutathione — the main cellular antioxidant and detox agent, helps the body effectively eliminate toxins.

HARMONY AND HEALTH

L-Carnitine — supports the energy metabolism of kidney cells, reduces fatigue, and accelerates recovery.

Cordyceps — traditionally used to strengthen kidneys, increase vitality, and improve body resilience.

Fulvic Acid — improves absorption and effectiveness of active components.

Forms of Use

Capsules — Daytime Protection

Taken in the morning and during the day, they provide antioxidant and anti-inflammatory support, improve microcirculation and metabolic processes.

Dosage: 1 capsule in the morning on an empty stomach.

Recommended course: at least 4 weeks.

Suppositories — Nighttime Support

Applied at night, when the body actively detoxifies and restores. Suppositories gently enhance detoxification and antioxidant protection.

Course: 10–20 days.

HARMONY AND HEALTH

Purpose

- Improvement of kidney filtration function.
- Reduction of risk of complications in diabetic nephropathy and early stages of chronic kidney disease (CKD).
- Support for those prone to inflammation.

Who Can Benefit from “Nefronit”

- People with increased kidney load (diabetes, hyperuricemia, metabolic syndrome)
- At early stages of chronic kidney disease
- For prevention in people at risk of kidney complications
- For everyone who cares about kidney health and wants to preserve their kidney function long-term

Advantages of Nefronit: all ingredients are well-studied, and their properties are confirmed by many years of clinical experience. This is a comprehensive approach to kidney protection — day and night.

Disclaimer: This product is not a medicinal drug. Consult your physician before use.
